Update Your Practice and Improve Outcomes of Your Multiple Sclerosis Patients! Join us for the 4th Annual Advanced Curriculum for Multiple Sclerosis Program.

Advanced Curriculum for Multiple Sclerosis, a CME pre-conference course held in conjunction with ACTRIMS Forum 2019, is designed to provide integral information for healthcare professionals involved in the treatment and management of patients with multiple sclerosis. In the recent years, scientific advances in pathophysiology and therapeutic options have exponentially progressed to a level of complexity such that many traditional educational formats prove limited. This intimate, classroom style conference is designed to fill the professional gaps present in the community of neurology. With twenty seven expert speakers, the faculty to learner ratio promotes interactive and engaged learning.
